

Dyna-Tek – ABOUT US

Dyna-Tek isn't new to the Die-Cutting industry. Our coatings have been very well received since it was first introduced as a private label product by PRECO ([link](#)) in 2017 under the brand names of *Die-Slide™* and *Die-Slide™ Renovate*.

Today, we still sell to the manufacturers of die-cutting equipment but have turned our focus to a direct sales business model that focuses on the CONVERTERS and other end-users. Because CONVERTERS are the ones tasked with overcoming adhesive build-up, having access to these coatings "in-house", they are now in a position to control their own destiny.

Dyna-Tek has become a world leader for hydrophobic coatings in various markets including two of the most regulated ones in the world, aerospace and medical. In aerospace, our semi-permanent composite mold sealers and mold release coating systems are being used on some of the most advanced aerospace composite parts in the world.

In aerospace, our clients include Spirit AeroSystems, Kawasaki Heavy Industries, Northrup Grumman and Boeing. At Boeing, we are one of only 3 companies in the world certified for Boeing's BAC5578 Process spec for their Advanced Carbon Fiber Reinforced Composite system which includes key composite structural components in the 787, 777 and related aircraft.

Dyna-Tek is approved for Northrup Grumman's B-21 Bomber program. The B-21 is considered by most to be the most advanced aircraft of its type in history.

Other markets Dyna-Tek is active in include:

1. Industrial molding/tooling used to process/mold a wide range of materials ranging from glass-filled nylon and PEEK to epoxy, and polyurethane products.
2. Pneumatic conveying industry, where we apply and supply clear PVC piping coated with our hydrophobic coatings reducing the coefficient of friction on the inside walls. This means less air CFM is needed to convey the same amount of materials.
3. Outdoor Sporting Goods Industry. We provide various coatings to manufacturers and consumers for firearms, archery, duck/fowl calling, fishing gear and other products.

Dyna-Tek is the developer, manufacturer, and distributor of our patented coatings.
